

Would you like to get to know Rwanda, a vacation there in far advanced, strong infrastructure, German, French and spend the most peaceful country in Africa. The international flair, the rapidly growing economy and its Development with experience. Unforgettable experiences of local culture, savanna animal, jungle with gorillas memories bring at home.

The organization “Women-Can” is your goal, special tours for woman

Declaration of accession I hereby apply for the recording as a decent member of Woman-Can on the enclosed form. I am tied to the declaration of accession for the current calendar year (financial year). My membership is tacitly extended by another calendar year, insofar as I did not submit my written termination to the association chairman at least three months before the end of the calendar year.

I undertake to recognize and observe the content of the association's statute - also externally - and to accept statutes and data protection.

Woman-Can supports single mothers

who live with their children on the street, buy clothes, cook together and discuss the training of their children and their future and try to get help from the population. The state has not yet supported such women and children. Love and marriage are completely different for men and women and to the disadvantage for the woman. Future uncertainty for single mothers, social integration, disclosure of the male producer, solution to health insurance problems.

The most important thing would be a social rethink that a single mother experiences the same appreciation as a wife with children and husband. The current practice in Rwanda is similar to that as in Europe 100 years ago. Society do not accept women with children without a husband. She is neither included in her own nor into the family of the new man. Often the illegitimate child has to be accommodated somewhere else in order to be able to marry a man. As a single mother, you no longer have access to society.

Signed, Martin Buhr August 2023
